

Indoor Amplified TV Antenna

This indoor amplified TV antenna receives over-the-air digital TV signals. It has loop and telescopic antennas for VHF/UHF reception and boosts signal strength.

Product Overview

High-Performance Digital Reception

This indoor amplified TV antenna is engineered to deliver crisp digital television signals directly to your home entertainment system. Featuring both loop and telescopic antennas, it ensures comprehensive coverage for both VHF and UHF frequency bands. The integrated amplifier and adjustable gain control provide users with the flexibility to optimize reception quality based on their specific location.
