

Indoor Digital TV Antenna

This basic antenna is wall mountable. It has a transitional UHF metal loop that is hidden with a slim, geometrical design.

Product Overview

High-Performance Digital Reception

This indoor digital TV antenna offers a versatile, slim, and fashionable design suitable for any modern home setup. Engineered to receive Full HD and local digital TV signals, it features retractable dipoles for optimized VHF reception and a unique lay-flat UHF element to widen reception range. With its flexible wall-mounting capabilities, including upright and upside-down orientations, it provides a discreet yet powerful solution for clear broadcast television.
