

Indoor Digital TV Antenna with Telescopic Antennas

This indoor TV antenna is designed for receiving over-the-air digital signals. It features extendable telescopic antennas for optimal signal reception.

Product Overview

Indoor Digital TV Reception Solution

This indoor digital TV antenna combines a modern, sleek design with practical functionality to enhance your viewing experience. It features a hidden traditional UHF metal loop and retractable telescopic dipoles, which are specifically designed to optimize VHF signal reception. Capable of receiving both Full HD and digital TV signals, this unit is an effective choice for urban and suburban areas looking to access local VHF and UHF broadcasts.

Technical Specifications

UHF Frequency Range	470-608 / 698 / 790 / 862 MHz
VSWR (UHF)	2.5
