

Indoor Electric Grill with Adjustable Temperature Control

This electric grill operates on 220V-240V at 50-60HZ with a 1300W power supply. Its compact size of 500x230x90mm makes it suitable for indoor use.

Product Overview

Indoor Grilling Perfection

This high-performance indoor electric grill is designed to bring the grilling experience into your kitchen with convenience and ease. Featuring adjustable temperature control and a durable stainless steel surface, it allows for precise cooking of meats, fish, and vegetables. Its compact design ensures it fits perfectly on countertops, while the removable components make cleanup simple and efficient.
