

# Indoor Flat TV Antenna for VHF/UHF Signals

This indoor TV antenna features integrated circuitry within a super-thin body. It is designed for multiple positioning to ease signal reception, making it a suitable choice for portable use.

## Product Overview

### High-Performance Indoor TV Reception

This ultra-thin, flat indoor antenna is designed to provide seamless access to high-definition VHF and UHF signals for crystal-clear broadcast television. Featuring advanced circuitry within a discreet body, it offers flexible positioning options on walls or windows to ensure optimal signal reception. The unit includes a detachable amplifier to boost performance in various environments, making it a versatile and reliable choice for local signal acquisition.

## Key Features

### Performance Highlights

Full HD Support, Digital TV Ready, Ultra-thin Design, Detachable Amplifier, Multiple Positioning

## Technical Specifications

### Key Metrics

**105 dBuV**  
Output Level

**3.5 dB**  
Noise Figure (Max)

**75  $\Omega$**   
Impedance

### UHF Frequency Range

470-608/698/790/862 MHz

### VSWR (UHF)

2.5

## Power and Compatibility

### Powering Methods

- AC/DC adaptor
- Digital receiver

### Working Voltage

DC 5V / 550mA
