

Indoor HDTV Antenna with Amplifier

This indoor HDTV antenna receives over-the-air digital television signals. It has adjustable telescopic antennas and a built-in amplifier to optimize signal reception and improve picture quality.

Product Overview

High-Performance Indoor Reception

The AV-721 indoor HD antenna is engineered with advanced SMD circuit technology to ensure reliable signal reception. Featuring a built-in high-gain, low-noise amplifier, it effectively boosts weak signals to minimize dropouts and enhance picture clarity. Its adjustable loop and telescopic design allow for precise tuning across VHF, UHF, and FM radio bands, making it a versatile solution for digital and analogue television needs.

Technical Specifications

Design & Build

- SMD circuit technology
- Adjustable loop aerial
- Adjustable telescopic antennas
- Compact and stylish form factor

Signal Compatibility

HDTV, Digital Terrestrial, Analogue TV, VHF, UHF, FM Radio

Performance

Signal Management

Built-in Amplifier • Low Noise • High Gain • Adjustable Gain Control
