Product Overview

Indoor Hydroponic Grow System

This indoor hydroponic growing garden provides an efficient and convenient solution for cultivating plants in controlled environments. Featuring a full-spectrum LED lighting system, it mimics natural sunlight to promote healthy growth for herbs, vegetables, and flowers. The system integrates automated water circulation and lighting schedules, ensuring consistent hydration and optimal development.

Technical Specifications

Dimensions

- L600 x W130 x H261-450mm
- L600 x W130 x H311-650mm

Performance Metrics

24 W Power	1.8 μmol/J PPE	0.5 Power Factor
----------------------	--------------------------	----------------------------

Optical Properties

120 °

Environment & Compliance

Environmental Ratings

IP54 • Class III Safety

Operating Conditions

Parameter	Range
Temperature	-10 to 35
Humidity	30% to 80% RH

EMC Compliance

Yes
