Overview

Professional Indoor Cycling Solution

This indoor magnetic resistance bike trainer stand is designed to convert standard bicycles into stationary exercise bikes, providing a reliable solution for year-round training. Constructed with a robust steel frame, it offers the stability required for intense workouts while maintaining a foldable design for convenient storage. The integrated magnetic resistance unit allows users to simulate various riding conditions, making it an ideal tool for maintaining fitness regardless of weather or seasonal changes.

Technical Specifications

Frame Material	Durable steel tubing
Resistance Type	Magnetic
Compatibility	700c Road Bikes, Various Bike Sizes

Features

Key Features

- Foldable design for portability
- Adjustable resistance levels
- Ventilated resistance unit housing
- Stable steel construction

Usage Environment

Indoor Use • Home Gym • Off-season Training
