

Indoor Plant Grow Tent

This grow tent is designed for indoor plant cultivation, providing a controlled environment for optimal plant growth. It features a reflective interior to maximize light distribution and a durable, light-tight exterior.

Product Overview

Professional Indoor Cultivation Environment

This indoor plant grow tent provides a highly controlled environment for optimal plant development. Engineered with premium, non-toxic Mylar fabric, the structure is designed to be completely light-tight, ensuring maximum efficiency for your lighting setup. Its reflective interior maximizes light distribution, while the robust frame supports essential accessories like ventilation systems and grow lights.

Construction & Materials

Fabric Material	600x300D Mylar Fabric
Material Properties	Non-toxic, Light-tight, Reflective Interior
