

Indoor Sensor Light with BNC Connectors and Digital Display

This indoor sensor light is designed for illumination systems. It features multiple BNC connectors, a digital display, and a keypad for control.

Overview

Professional Indoor Illumination Control

This advanced indoor sensor light is designed for precision illumination workstations and specialized lighting environments. Featuring an integrated digital display and responsive keypad control, it offers operators granular management over light sensing parameters. Equipped with multiple BNC connectors, the system ensures seamless integration into existing professional monitoring and control infrastructure.

Technical Specifications

Control Interface

- Digital Display
- Tactile Keypad

Interface Connectors

BNC

Primary Application

Indoor Fluorescence Workstation

Model Series

GW5000F-AA
