## Product Overview

### Professional Indoor Grilling Solution

This indoor smokeless grill utilizes advanced far-infrared light wave technology to deliver a clean, efficient barbecue experience. Designed for professional and home use, it features a 360° automatic rotation system and precise digital controls to ensure even cooking without the smoke and emissions associated with traditional grilling. With a durable non-stick surface and user-friendly safety features, it provides a versatile and healthy way to prepare meats, seafood, and vegetables.

## Technical Specifications

Power Rating	1500 W
Voltage	220V-50Hz
Temperature Range	80-280°C
Timer Range	1-99 minutes
Power Levels	11

## Dimensions & Weight

Product Dimensions	42.5 x 31 x 27 cm
Net Weight	3.7 kg

## Key Features

Utilizes far-infrared rays and 360° automatic rotation for even, smokeless cooking.

Features a 120° removable furnace head for easy ingredient access and automatic power-off safety.

Intuitive LED touch interface allows for precise control over power levels and cooking time.

Advanced surface design with oil drainage holes to reduce fat accumulation and ensure healthier cooking.

Includes safety features such as a detachable oil collection box and heat-resistant silicone ring.

### Pre-set Cooking Options

- Vegetables: 10 min @ 180°C
- Steak: 13 min @ 200°C
- Barbecue: 8 min @ 250°C
- Seafood: 15 min @ 280°C
