Product Overview

Professional Indoor Insect Control

This sticky fly trap utilizes advanced 365nm UV light technology to effectively lure and capture flying insects such as flies and mosquitoes. Designed with a high-viscosity adhesive system, it offers a silent, odorless, and eco-friendly solution for both residential and commercial environments. The 180-degree groove design and rotatable panel ensure maximum trap efficiency and user-friendly maintenance.

Technical Specifications

Design Features

- 180-degree groove design for improved efficiency
- Rotatable panel for easy adhesive paper replacement
- Silent and odorless operation
- Customizable exterior appearance

UV Light Wavelength	365 nm
Capture Technology	UV Light Lure, High Viscosity Adhesive

Usage Guidelines

Recommended Environment

Residential • Commercial • Indoor Use

Placement Best Practices

Guideline	Action
Distribution	Place evenly throughout the monitoring area
Sunlight	Avoid direct sunlight to maintain lure efficacy
Environment	Avoid windy, dusty, or high-humidity areas
