

Indoor TV Antenna for UHF/VHF

This indoor TV antenna is designed for UHF and VHF signal reception. It has adjustable gain control for optimizing signal strength and clarity, and its compact design suits various indoor environments.

Product Overview

Professional Indoor Signal Reception

This high-performance indoor TV antenna is engineered for reliable UHF and VHF signal capture. Featuring adjustable gain control, it allows users to optimize signal strength and image clarity for a superior viewing experience. Its compact and versatile design ensures it fits seamlessly into various indoor environments, providing a robust solution for enhanced broadcasting reception.

Technical Specifications

Supported Bands	UHF, VHF
Power Input	AC Adapter
Power Indicator	Yes

Features

Design Features

- Adjustable gain control
- Telescopic antenna elements
- Integrated loop antenna
- Compact form factor
