

Indoor TV Antenna with Fabric Cover

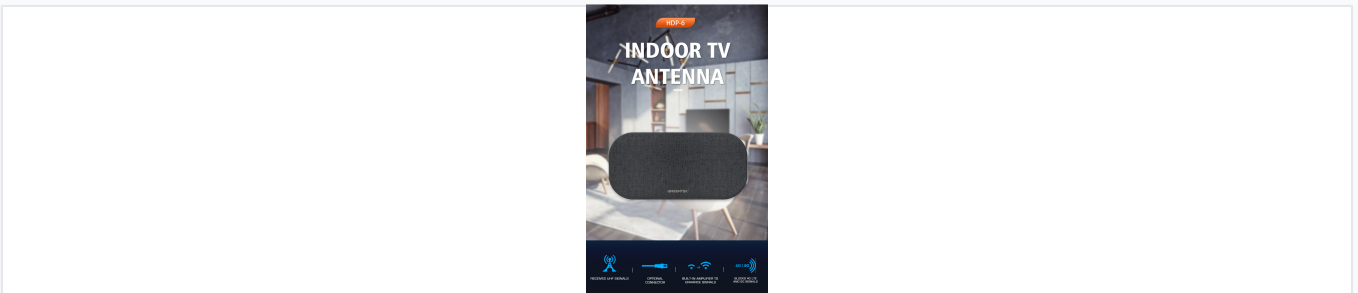

This indoor TV antenna is designed for optimal signal reception. Its sleek design allows discreet placement while providing enhanced signal strength for over-the-air broadcasts.

ADDITIONAL IMAGES

Overview

Engineered to receive UHF signals with built-in amplification and 4G/5G interference blocking.

Modern Indoor Entertainment

This indoor TV antenna combines a sleek, fabric-covered aesthetic with high-performance signal reception technology. Designed to blend seamlessly into modern home decor, it provides reliable access to Full HD, digital TV, and local UHF signals. With integrated 4G and 5G interference filtering and a built-in amplifier, it ensures a clear viewing experience while offering flexible tabletop or wall-mount installation options.

Technical Specifications

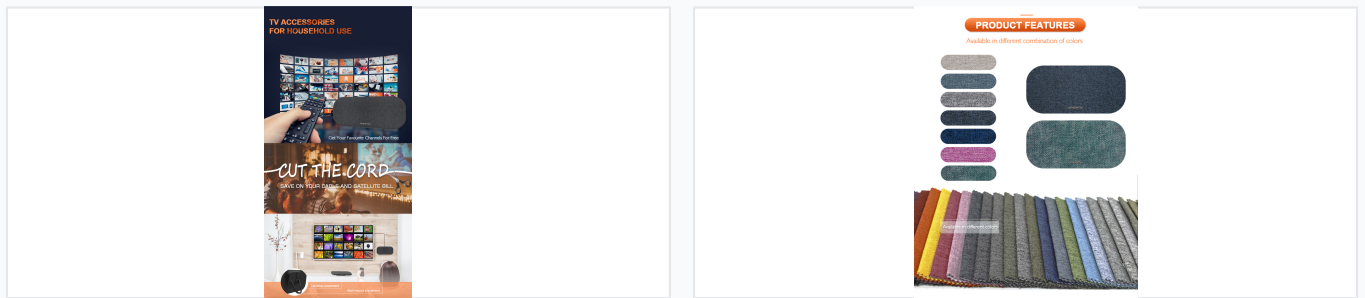

Sleek fabric-covered front design with integrated cable management on the back.

Clear setup guidance for connecting via set-top box or direct TV tuner.

Dimensions	280 x 75 x 140 mm
