

Indoor TV Antenna with Fabric Finish

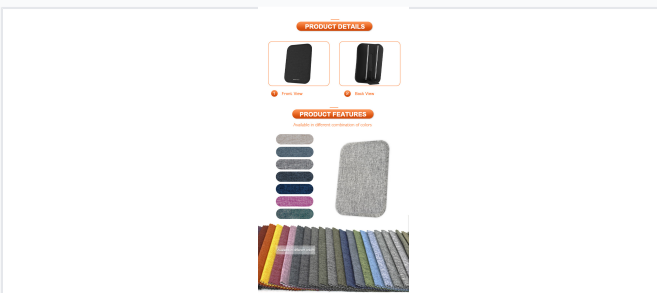

This indoor TV antenna features a fabric finish for blending into modern home decor. It is designed for optimal signal reception, providing access to over-the-air broadcast channels.

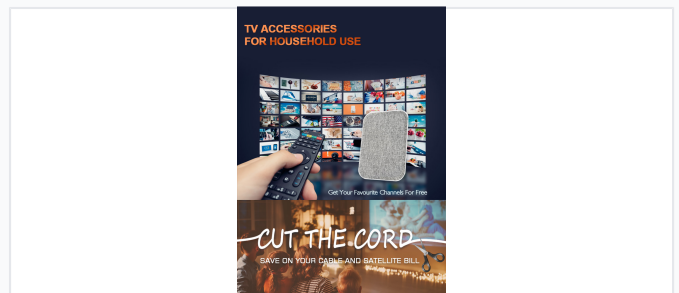

ADDITIONAL IMAGES

Overview

Modern fabric finish complements home decor with an adjustable stand for optimal positioning.

A cost-effective solution for accessing free over-the-air broadcast channels.

Modern Indoor Reception Solution

Designed to blend seamlessly into contemporary home decor, this indoor TV antenna features a premium fabric finish that offers a soft, comfortable aesthetic. It provides reliable access to over-the-air broadcast channels by supporting both UHF and VHF frequencies. Engineered for performance, the unit includes advanced filtering to block 4G LTE and 5G signal interference, ensuring a crisp and clear viewing experience for your digital content.

Technical Specifications

Engineered to receive UHF and VHF signals while blocking 4G/5G interference.
