

Indoor UHF/VHF/FM TV Antenna

This indoor TV antenna is designed for receiving UHF, VHF, and FM signals. It features adjustable telescopic antennas for optimal VHF and FM reception, and a flat panel element for UHF.

Product Overview

Professional Indoor Signal Solution

This indoor UHF/VHF/FM TV antenna is engineered to deliver reliable signal reception for a wide range of frequencies. Featuring a versatile design with adjustable telescopic rods and a dedicated UHF flat panel, it provides the flexibility needed to optimize reception in varying environments. The integrated tuning knob allows users to fine-tune signal quality, making it an ideal choice for enhancing clarity on legacy television sets or in areas with challenging signal coverage.

Technical Specifications

Supported Frequency Bands	UHF, VHF, FM
Tuning Control	Yes

Physical Design

Antenna Configuration

- Adjustable telescopic VHF/FM antennas
- Integrated UHF flat panel element
- Stable tabletop base

Mounting Type	Tabletop
