

Indoor VHF/UHF TV Antenna

This indoor TV antenna receives both VHF and UHF signals. It has a circular reflector and adjustable dipoles for enhanced signal capture and optimal reception.

Product Overview

Professional Indoor Signal Reception

This indoor TV antenna is engineered to provide reliable VHF and UHF signal capture for homes and professional office environments. Featuring a specialized circular reflector and adjustable dipoles, it is designed to optimize clarity and signal stability. The integrated tuning base allows users to precisely calibrate reception, ensuring a high-quality over-the-air viewing experience.

Technical Specifications

Design Components
