Product Overview

Advanced Induction Heating Technology

This intelligent rice cooker utilizes advanced induction heating (IH) technology to ensure even, precise temperature control for perfectly cooked rice. Featuring a high-performance 1200W heating system, it delivers rapid, uniform heat distribution directly to the rice core. The durable, thickened composite pot construction enhances heat retention and conductivity, resulting in superior rice texture and flavor.

Performance Metrics

Heating Power

1200 W

Power Output

Design & Construction

Pot Material	Steel-aluminum composite
Pot Thickness	2 mm
Cover Design	Removable stainless steel

Features & Usability

Control Interface	Touching Panel
Timer	24 h
Cooking Capabilities	Induction Heating, Keep Warm, Digital Display, Non-stick
