

Industrial Air and Water Filter

This high-efficiency filter is designed for industrial air and water purification systems. It features a multi-pocket design to maximize surface area and dust holding capacity.

Product Overview

Industrial Filtration Solution

This high-efficiency filter is engineered for demanding industrial environments, providing reliable removal of particulate matter from both air and water streams. Constructed with a durable, moisture-resistant synthetic media and a robust metal frame, it ensures long-lasting performance even in harsh conditions. The multi-pocket design significantly maximizes surface area to deliver superior dust-holding capacity and consistent filtration quality.

Technical Specifications

Filter Media	Synthetic
Frame Material	Metal
Design Features	Multi-pocket, Moisture Resistant, Chemical Resistant

Application

Compatible Systems

- Air Purification Systems
- Water Processing Equipment

Performance

Key Performance Indicators

100 %

Particulate Removal Efficiency
