

Industrial Air Compressor

This compressor is designed for industrial applications requiring high air volume. It delivers consistent pressure with its large capacity air tank and powerful motor.

Product Overview

Industrial Performance

This heavy-duty industrial air compressor is engineered for demanding environments requiring high air volume and consistent, reliable pressure delivery. Featuring a robust frame and an advanced control panel, it offers precise operation for diverse industrial applications. The system integrates a large-capacity air tank with a powerful motor to ensure maximum efficiency during continuous use.

Technical Specifications

Operational Components

- Robust structural frame
- Multiple pressure gauges
- Advanced control interface
- Large capacity air tank
- High-performance motor

Model Number

JH25-160

Key Features

Heavy-duty construction, High air volume, Consistent pressure, Advanced control panel
