

Industrial Air Compressor

This air compressor features a finned cylinder head for heat dissipation and a pressure gauge for performance monitoring. Its durable construction ensures reliability in industrial and commercial settings.

Overview

Air Pump Series Overview

The Air Pump Series is engineered for reliability and performance in demanding industrial and commercial environments. Featuring a robust construction, this unit includes a specialized finned cylinder head designed for superior heat dissipation. Its compact form factor ensures seamless integration into existing pneumatic systems, while the integrated pressure gauge allows for precise performance monitoring.

Key Features

Build Quality

Industrial Grade • High Durability

Design Highlights

Robust Construction, Finned Cylinder Head, Compact Design, Integrated Pressure Gauge

Technical Specifications

Heat Dissipation Method	Finned cylinder head design
Monitoring	Yes
