

Industrial Air Compressor

This high-performance air compressor is designed for industrial and professional use. It features a robust motor, durable tank, and efficient cooling system.

Product Overview

Industrial Performance

This high-performance air compressor is engineered for demanding industrial and professional environments. It features a robust motor, a durable tank, and an efficient cooling system to ensure consistent air pressure for a wide range of applications, including pneumatic tools, spray painting, and inflation. Designed for reliability and long service life, it comes equipped with essential safety features and intuitive controls for ease of use.

Technical Specifications

Power Rating

4 HP

Horsepower

3 KW

Power Output

Model Number

YC-1.0/8

Tank Capacity

100 L

Features

Equipment Highlights

- Robust motor design
- Durable air tank construction
- Efficient cooling system
- Integrated safety features
- Easy-to-use control interface

Suitable Applications

Pneumatic Tools, Spray Painting, Inflation
