

Industrial Air Compressor with Integrated Tank

This air compressor is designed for industrial applications. It features a multi-cylinder pump and an integrated air tank for long-lasting performance and reliable air supply.

Overview

Industrial-Grade Air Compression

This robust air compressor is engineered specifically for demanding industrial environments, providing a reliable and consistent air supply. Featuring a durable multi-cylinder pump design and an integrated air tank, it is built to withstand rigorous daily use. Its efficient construction ensures long-lasting performance, making it an essential asset for workshops and manufacturing facilities requiring steady pneumatic power.

Technical Specifications

Model Designation	W-0.36/8
Pump Configuration	Multi-cylinder
Key Features	Integrated Tank, Industrial Grade, Heavy Duty
