

# Industrial Air Compressor with Triple Pump Units

This high-capacity air compressor is designed for continuous operation. It features three independent pump units mounted on a horizontal tank, delivering compressed air for various pneumatic tools and equipment.

## Product Overview

### Industrial-Grade Performance

This high-capacity industrial air compressor is engineered for reliability and high air delivery rates in demanding environments. Featuring three independent pump units mounted on a large horizontal tank, it ensures consistent pneumatic power for continuous operation. Designed with mobility and safety in mind, it is an ideal solution for large workshops, professional garages, and heavy-duty industrial applications.

## Technical Specifications

Pump System	Triple independent pump units
Key Features	Horizontal Tank, Pressure Gauges, Safety Valves, Mobile Chassis

## Application

### Target Environments

- Professional Workshops
- Automotive Garages
- Industrial Settings
