

Industrial Air Conditioning Unit

This air conditioning unit is designed for industrial use. It is suitable for cooling large spaces such as server rooms.

Product Overview

Industrial Cooling Solution

This industrial air conditioning unit is engineered for high-demand environments such as server rooms and large-scale facilities. It features a robust, integrated design mounted on a heavy-duty green metal frame for stability and ease of installation. The system includes advanced control interfaces and visible internal components, allowing for precise system management and straightforward maintenance access.

Technical Specifications

Maintenance Access

- Accessible internal components
- External control panels
- Modular system integration

Mounting Configuration

Integrated frame-mounted system

Frame Finish

Green

Control Interface

Keyboard, Monitor, Control Panels

Application Suitability

Recommended Environments

Server Rooms • Industrial Facilities • Large Scale Cooling
