

Industrial Air Conditioning Unit for Textile Manufacturing

This air conditioning unit is designed for industrial and commercial spaces. It provides efficient cooling and air circulation to maintain optimal temperature and humidity levels in garment, shoe, and accessory manufacturing environments.

Product Overview

Industrial Climate Control Solution

This freestanding air conditioning unit is engineered specifically for industrial and commercial environments, such as textile, garment, and shoe manufacturing facilities. It provides efficient cooling and consistent air circulation to maintain optimal temperature and humidity levels for sensitive production processes. Its robust design ensures reliable performance while integrating seamlessly into professional workspaces.

Technical Specifications

Core Functions

- Efficient Cooling
- Air Circulation
- Humidity Control
- Temperature Regulation

Unit Type	Freestanding
Suitable Environments	Textile Manufacturing, Garment Production, Shoe Manufacturing, Industrial Spaces, Commercial Spaces

Design & Aesthetics

Design Features

Sleek Modern Design • White Finish • Decorative Patterns
