

Industrial Air Cooler KD18

The KD18 industrial air cooler is designed for efficient cooling in large spaces. Its durable, weather-resistant housing includes louvered vents for optimal airflow and consistent cooling performance.

Overview

Industrial Air Cooler KD18

The KD18 industrial air cooler is engineered for high-performance cooling in demanding environments such as factories, warehouses, and showrooms. It features a robust, weather-resistant design with optimized airflow technology to ensure consistent, powerful cooling while maintaining low noise levels. With advanced features like an auto-clean system and high-quality pre-filters, this unit offers a reliable, low-maintenance solution for large-scale climate control.

Performance

Fan Speed Settings	9 speeds
Phase Configuration	Single speed for 3 phase

Features

Key Features	High performance cooling pads, Auto Clean system, Low noise operation, Weather-resistant housing, Easy installation
Control Interface	Wired remote controller with running status LED display

Maintenance

Maintenance Components

- High quality air pre-filter
- Auto Clean system to prevent pad clogging

Applications

Suitable Environments

Factories • Warehouses • Showrooms • Outdoor Areas
