Product Overview

High-Performance Industrial Cooling

This industrial air cooler unit is engineered for demanding environments, offering versatile mounting configurations including ceiling, floor, and cross-air blow options. Designed for optimal heat exchange and airflow, it utilizes high-quality components to ensure durability in refrigeration and HVAC systems. The unit's flexible material construction allows it to be tailored for specific industrial cooling requirements.

Configuration & Mounting

Mounting Styles

Ceiling Mounted, Floor Mounted, Cross Air Blow Ceiling Mounted

Technical Components

Available Fan Models

- D050
- D071
- D091

Material Specifications

Material Compatibility

Component	Available Materials
Hairpin Tube	Steel, Stainless Steel, Copper, Aluminum
Fin	Steel, Stainless Steel, Copper, Aluminum
