

Industrial Air Curtain for Refrigeration

This industrial air curtain is designed for refrigeration and ventilation applications. It features adjustable louvers for airflow control and a compact design suitable for maintaining temperature in commercial and industrial environments.

Product Overview

Industrial Efficiency for Refrigeration

This industrial air curtain is specifically engineered for refrigeration and ventilation applications, providing a reliable barrier to maintain temperature control. Its robust construction features adjustable louvers for precise airflow management, ensuring minimal energy loss in commercial and industrial settings. The compact design allows for seamless installation above doorways or openings, making it an essential solution for busy facility environments.

Technical Features

Airflow Control	Adjustable Louvers, Protective Grille, High-Velocity Output
Installation Style	Compact overhead mounting

Application

Primary Applications

- Commercial Refrigeration
- Industrial Ventilation
- Temperature Controlled Environments
- Entryway Air Containment
