

Industrial Air Filter Media

This air filter media features a large filter surface and firm structure. It offers low pressure loss, a high cost performance ratio, and can be washed for economical and practical use.

Product Overview

Industrial Air Filter Media

This high-efficiency air filter media is engineered for demanding industrial and HVAC applications. Constructed from durable synthetic fibers, the material offers exceptional moisture resistance and chemical stability, ensuring reliable performance in varied environments. Its non-woven structure provides a superior balance between particulate capture efficiency and airflow characteristics, making it an ideal choice for panel, bag, and cartridge filter configurations.

Technical Specifications

Performance Features

- High particulate capture efficiency
- Optimized airflow characteristics
- Moisture resistant
- Chemical degradation resistance

Customization

Variable Thickness • Variable Density

Material Composition

Synthetic fibers / Wicking paper

Suitable Filter Types

Panel Filters, Bag Filters, Cartridge Filters, Humidifiers
