

Industrial Air Filtration System

This high-efficiency air filtration system is designed for industrial machinery. It ensures clean air intake, protecting sensitive equipment from dust and contaminants.

Product Overview

High-Efficiency Industrial Air Filtration

This industrial air filtration system is engineered to provide superior protection for sensitive machinery. Featuring a robust dual-filter configuration, it effectively removes dust and contaminants from the air intake stream. The system is built on a durable metal base, ensuring stability and longevity in demanding industrial environments.

Design & Construction

Finish

- Chrome-finished primary filter
- Black secondary filter

Filter Setup

Dual-filter, Primary Filter, Secondary Filter

Base Material

Sturdy metal

Application

Primary Application

Industrial Machinery • Equipment Protection • Air Intake Filtration
