

Industrial Air-Oil Separator

This air-oil separator is designed for industrial compressors. It ensures the efficient separation of oil from compressed air, which results in a cleaner air output and prolongs the compressor's lifespan.

Product Overview

Industrial Air-Oil Separator

This high-performance air-oil separator is engineered for industrial compressors to ensure efficient oil separation from compressed air. By delivering cleaner air output, it significantly contributes to the longevity and reliability of your compressor system. Built with robust materials, it is designed to withstand demanding industrial environments.

Technical Specifications

Model Number	OLA0010
Manufacturing Origin	EU

Performance Metrics

Maximum Working Pressure

24 BAR

Max Pressure

348 PSI

Max Pressure

Maximum Working Temperature

100 °C

Max Temperature

212 °F

Max Temperature

Safety and Maintenance

Safety Instructions

- Do not dismantle the oil separator; internal components are under 24 bar pressure.
- Change the air-oil separator periodically according to maintenance instructions.
- Follow mounting instructions for optimal performance.
