Industrial Signaling Reliability

The SCF UC4 series industrial alarm bell is a robust signaling device designed for critical safety and notification applications. Operating at 220VAC, this unit provides a loud, clear audible alert suitable for both industrial and commercial environments. Its compact 80mm design ensures reliable performance in demanding settings, making it an essential component for fire alarm systems and emergency notifications.

Technical Specifications

Operating Voltage	220VAC
Frequency	50/60Hz
Diameter	80 mm

Application

Recommended Uses	Fire Alarm Systems, Emergency Notification, Industrial Signaling, Commercial Alerting

Series Information

Available Series

- SCF Series
- UC4 Series
