

Industrial Amalgamator for Heavy-Duty Mixing

This industrial amalgamator is designed for heavy-duty mixing applications. It features a robust construction with a mixing chamber, internal blades, and a control panel with safety features.

Overview

Heavy-Duty Mixing Solution

This industrial amalgamator is engineered for demanding mixing applications where consistency and durability are paramount. Featuring a robust construction, the system integrates powerful motors with a specialized mixing chamber equipped with high-performance internal blades. Designed with safety and efficiency in mind, the unit includes an accessible mixing chamber with an openable lid and a dedicated control panel for precise operational management.

Design & Construction

| | |
|-------------------|----------------------------|
| Construction Type | Industrial Heavy-Duty |
| Lid Features | Openable, Circular Opening |

Technical Features

Safety Systems

Integrated Control Panel • Safety Interlocks

Mixing Mechanism

- Internal mixing blades
- High-torque motor drive
- Enclosed mixing chamber
