

Industrial Apparel Sewing Machine with Direct-Drive Motor

This industrial sewing machine is designed for high-volume apparel production. It features a direct-drive motor for energy efficiency, programmable stitch patterns, and automatic thread trimming.

Product Overview

Industrial Apparel Sewing Machine

This high-performance industrial sewing machine is engineered for high-volume apparel production environments. It integrates an advanced direct-drive motor to maximize energy efficiency while maintaining consistent, high-quality stitching across a variety of fabric types. Equipped with a digital control panel, the unit allows for precise parameter monitoring and the customization of programmable stitch patterns to streamline complex assembly tasks.

Key Features

Automation Capabilities

- Automatic thread trimming
- Programmable stitch patterns
- Digital control panel interface

Motor Technology

Direct-Drive Motor • Energy Efficient

Application

Primary Use

Industrial Apparel Production, High-Volume Manufacturing
