

Industrial Axial Fan for Ventilation Systems

This industrial axial fan is designed for high-volume air movement in ventilation systems. The fan features a robust construction with a central motor assembly and evenly spaced mounting points on the housing for secure installation.

Overview

Industrial Axial Fan

This industrial axial fan is engineered for high-volume air movement in demanding ventilation systems. Featuring a robust gray circular housing and a four-blade design, it provides reliable and efficient air circulation. Its construction includes a central motor assembly and standardized mounting points, making it suitable for a wide range of industrial applications.

Technical Specifications

Blade Count	4
Housing Type	Circular
Construction Features	Robust Construction, Central Motor Assembly, Industrial Grade

Installation

Mounting Style	Evenly spaced mounting points on housing
----------------	--

Application

Primary Applications

- Ventilation Systems
- Industrial Air Circulation
- High-Volume Air Movement
