

Industrial Axial Flow Fan

This industrial axial flow fan is designed for high-volume air movement in industrial environments. It features a robust construction with a cylindrical housing and a multi-blade impeller, suitable for ventilation, cooling, and exhaust systems.

Product Overview

Industrial Axial Flow Fan

This industrial axial flow fan is engineered for high-volume air movement in demanding industrial environments. Featuring a robust cylindrical steel housing and a multi-blade impeller, it ensures efficient and consistent airflow. The unit is designed with an aerodynamic bellmouth inlet to minimize turbulence and optimize performance, making it an ideal solution for ventilation, cooling, and exhaust systems in factories and warehouses.

Technical Specifications

Housing Material	Steel
Mounting Type	Floor-mounted with support legs
Inlet Type	Aerodynamic bellmouth

Application

Suitable Settings

Factories • Warehouses • Industrial Facilities

Primary Applications	Ventilation, Cooling, Exhaust Systems
