

Industrial Backflow Prevention Check Valve

This check valve is designed to prevent backflow and maintain pressure within industrial systems. Its durable construction ensures longevity and resistance to wear and tear.

Product Overview

Industrial Backflow Prevention

This industrial check valve is engineered to prevent backflow and maintain consistent system pressure across a variety of machinery applications. Constructed from durable materials with a robust design, it ensures reliable performance and longevity even in demanding environments. Its sturdy build provides high resistance to wear and tear, making it a dependable component for general industrial valve requirements.

Key Features

Key Highlights

32 DN

Nominal Diameter

Technical Specifications

Nominal Diameter	32 DN
Primary Function	Backflow prevention and pressure maintenance
Application Scope	General Machinery, Industrial Valves, Pressure Systems

Construction & Durability

Build Quality

- Robust industrial design
- Durable material construction
- High resistance to wear and tear
- Long-service life engineering

Performance Status

Heavy Duty • Reliable Performance
