

Industrial Ball Valve DN15-25

This ball valve is designed for industrial applications requiring reliable shut-off. It is available in DN15-25 specification.

Overview

Industrial Ball Valve Overview

This high-quality ball valve is engineered for demanding industrial applications, offering reliable flow control and shut-off capabilities. Constructed with a durable brass body and a smooth-operating lever handle, it ensures long-lasting performance in various fluid systems. It is an ideal solution for plumbing, HVAC, and general industrial maintenance tasks requiring robust durability.

Technical Specifications

Nominal Diameter	DN15-25
Connection Type	1/2 inch NPT

Performance Metrics

Maximum Working Pressure

600 PSI
Max Pressure

Temperature Range	-20°F to 300°F
-------------------	----------------

Design & Materials

Body Material

Brass

Operation Mechanism	Lever Handle
---------------------	--------------

Applications

Suitable Industries	Plumbing, HVAC, Industrial Systems
---------------------	------------------------------------
