

Industrial Ball Valve with Butterfly Handle

This ball valve is designed for industrial applications to control the flow of liquids and gases. It features a durable brass body and a red butterfly handle for easy operation.

Product Overview

Industrial Ball Valve JM1104

The JM1104 industrial ball valve is a robust, high-performance solution designed for reliable flow control in demanding environments. Featuring a durable brass body and an ergonomic red butterfly handle, this valve ensures smooth and intuitive operation for both liquid and gas systems. It is engineered for versatility, making it an ideal choice for water, oil, and gas pipeline applications where consistent shut-off capabilities are required.
