

# Industrial Basket Centrifuge Extractor

This industrial basket centrifuge extractor efficiently separates liquids from solids. It features stainless steel construction, a robust motor for high-speed rotation, and a safety lid with a secure locking mechanism.

## Product Overview

### Industrial Basket Centrifuge Extractor

This industrial-grade basket hydro extractor is engineered for high-efficiency liquid separation from solid materials. Built with durable stainless steel, it features a robust motor capable of high-speed rotation to ensure optimal extraction performance. The unit is designed for safety and stability, incorporating a secure locking lid mechanism and a vibration-dampening base for reliable operation in demanding environments.

## Technical Specifications

### Key Features

- High-speed rotation motor
- Safety lid with secure locking mechanism
- Adjustable speed and cycle time control panel
- Mobile liquid collection tank
- Vibration-dampening base

<b>Construction Material</b>	Stainless Steel
------------------------------	-----------------

## Operational Details

### Included Accessories

Mobile Collection Tank • Vibration-Dampening Base

<b>Control System</b>	Adjustable Speed, Programmable Cycle Time
-----------------------	-------------------------------------------
