

Industrial Basket Strainer

This strainer is designed for industrial applications, featuring flanged connections for easy integration. It removes particulate matter from fluids, protecting downstream equipment and ensuring process efficiency.

Product Overview

Industrial Filtration Solutions

These industrial strainers are engineered to remove particulate matter from fluid systems, effectively protecting downstream equipment from damage and maintaining process efficiency. The series includes versatile configurations such as Basket, Y-type, and T-type designs to accommodate various pipeline requirements. Featuring robust construction, these units are designed for durability and easy maintenance in demanding industrial environments.

Product Range

Available Types

- Basket Strainer
- Y-type Strainer
- T-type Strainer

Key Features

Product Highlights

Industrial Grade, Easy Maintenance, Flanged Connections, Particle Protection
