

Industrial Bimetal Thermometer with Stainless Steel Casing

This industrial bimetal thermometer is designed for accurate temperature measurement in a range of applications. It features a stainless steel construction, ensuring durability and corrosion resistance for reliable performance in harsh environments.

Product Overview

Industrial Bimetal Thermometer

This industrial bimetal thermometer is a robust temperature measuring instrument designed for accurate monitoring in harsh environments. Utilizing a bimetallic strip that responds directly to temperature changes, it provides reliable readings without the need for an external power source. Its durable stainless steel construction ensures excellent corrosion resistance, making it ideal for pipelines, tanks, and equipment across various industrial sectors.

Technical Specifications

Connection Type	Bottom Entry
Thread Standards	BSP, NPT, BSPT
Connection Size	1/2"

Performance Metrics

Temperature Range

-20 °C
Minimum

100 °C
Maximum

Design & Construction

Key Features

- Corrosion resistant construction
- No external power required
- Direct dial temperature indication
- Robust sensing probe

Casing Material

Stainless Steel

Applications

Suitable Industries

Chemical Processing • Food and Beverage • HVAC • Oil and Gas
