

Industrial Blow-Molded Plastic Containers

These blow-molded plastic containers are designed for industrial and agricultural applications. They come in various shapes, sizes, and colors, suitable for storing and dispensing liquids.

Product Overview

Industrial-Grade Blow-Molded Containers

These industrial blow-molded containers are engineered for robust performance in demanding liquid storage and dispensing applications. Their durable construction makes them ideal for agricultural or industrial environments where reliability and chemical compatibility are essential. With a variety of capacities and neck finish options, these containers offer versatile solutions for specialized handling and storage requirements.

Technical Specifications

Design Options

- Multiple volume capacities
- Variable neck finish styles
- Diverse shape configurations
- Color variety

Closure Compatibility

1 Type

Dispensing Mechanism Compatibility

Manufacturing Process

Blow-molded

Application Fields

Industrial, Agricultural, Liquid Storage, Dispensing
