

Industrial Bluetooth Terminal Adapter

This compact adapter enables wireless communication for terminal devices in industrial settings. It facilitates seamless data transfer and control with its robust design and Bluetooth connectivity.

Overview

Industrial Wireless Connectivity

The K70 is a compact Bluetooth wireless terminal adapter engineered for demanding industrial applications. It facilitates seamless data transfer and control for terminal devices, eliminating the need for complex wiring in machinery settings. Its robust design ensures reliable performance and high compatibility across various industrial environments.

Core Performance

Key Performance Metrics

1.66 GHz

Processor Speed

160 GB

Storage Capacity

1 GB

Standard RAM

Technical Specifications

Processor	Intel Atom N450
L2 Cache	512 KB
FSB Speed	667 MHz

Storage & Memory

Memory Configuration

- 1GB Standard
- 2GB Optional

Storage Interface	2.5 inch SATA
Memory Type	DDRII

Connectivity & Design

Design

Compact • Industrial Grade • Wireless

Wireless Technology	Bluetooth
---------------------	-----------

Compliance

Certifications	CE, FC
