

# Industrial Boiler System

This industrial boiler system is engineered for high-efficiency thermal energy generation. It features a multi-pass heat exchanger and automated controls suitable for steam or hot water production.

## ADDITIONAL IMAGES

## Overview

### Industrial Boiler System

This industrial boiler system is engineered for high-performance thermal energy generation, suitable for various demanding industrial applications. It features a robust construction designed for durability and efficiency in steam or hot water production. The system is built to international standards, ensuring reliability and safety for professional operations.

## Certifications

Certifications

ASME, CE

## Steam Boiler Specifications

### Steam Boiler Metrics

**25 t/h**

Max Rated Evaporation

**2.5 MPa**

Max Working Pressure

## Thermal Oil Boiler Specifications

### Thermal Oil Boiler Metrics

**23000 KW**

Max Delivered Heat

**1.1 MPa**

Design Pressure
