

# Industrial Bottle Washing Machine

This industrial bottle washer is designed for high-volume cleaning and sanitization. It features a multi-stage washing process with adjustable settings and stainless steel components.

## Overview

### High-Efficiency Bottle Cleaning Solution

This single-ended soak and rinse bottle washer is engineered for compact, space-saving operations where bottle entry and exit occur at the same end. Designed for high-volume environments, the system features advanced PLC control, frequency synchronous control, and CNC temperature regulation to ensure precise cleaning. It is an ideal solution for processing new or returnable glass bottles, including beer and soda containers, offering reliable performance for the beverage industry.

## Technical Specifications

Control Systems	PLC Control, Frequency Synchronous Control, VVV/F Timing, CNC Temperature Control
Design Type	Single-ended soak and rinse

## Applications

### Suitable Containers

- New glass bottles
- Returnable glass bottles
- Beer bottles
- Soda water bottles
- Similar round glass bottles

## Operational Features

### Automation Level

High Automation
