

Industrial Bridge Crane

This heavy-duty crane features a robust steel structure with twin lifting towers and supporting beams. It is designed for lifting and moving extremely heavy loads in construction or industrial settings.

Overview

Industrial Bridge Crane

This heavy-duty industrial bridge crane is engineered for demanding lifting operations in construction and shipyard environments. Featuring a robust, yellow-painted steel structure with twin lifting towers, it provides exceptional stability and load-bearing capacity. The system integrates a complex arrangement of pulleys, cables, and winches, ensuring reliable performance for moving extremely heavy loads.

Technical Specifications

Structure Type	Twin-tower bridge crane
Finish	Industrial yellow-painted steel
Lifting Mechanism	Twin Towers, Pulley System, Winch System, Heavy-duty Cables

Application

Suitable Environments

Construction Sites • Shipyards • Heavy Industrial Facilities
