

Industrial Bubble Pump for Fluid Transfer

This industrial bubble pump is engineered for efficient fluid or gas transfer using bubble formation. Its durable construction ensures reliable performance in demanding environments.

Overview

Industrial Bubble Pump

This industrial bubble pump is engineered for efficient fluid and gas transfer, utilizing the principle of bubble formation to ensure consistent flow. Its compact, robust design includes a sealed enclosure and versatile mounting points, making it suitable for demanding industrial environments. Designed for reliability, this unit supports precise control in a wide range of fluid handling applications.

Technical Specifications

Rated Voltage	24 V
Rated Current	2 A
Certifications	CE

Design & Construction

Enclosure	Sealed
Mounting Points	Yes
