

Industrial Butterfly Valve

This butterfly valve is designed for controlling fluid flow in pipelines. It features robust construction and a manual handwheel actuator.

Product Overview

Industrial Butterfly Valve

This industrial butterfly valve is engineered for reliable fluid flow control in demanding pipeline environments. Featuring a robust, heavy-duty construction with a distinct green-painted body and red-painted interior, it is built to withstand rigorous industrial conditions. The unit is equipped with a manual handwheel actuator, providing precise and intuitive operation for opening and closing processes.

Technical Details

Finish

- Green-painted body
- Red-painted interior

Actuation

Manual Handwheel

Design Features

Heavy-duty, Robust Construction, Manual Control
